

Essager ECT33W-LJB02-Z 33W C+A Charger (white)

Essager ECT33W-LJB02-Z 33W C+A Charger (white)

Ref: 6971958732470

Essager ECT33W-LJB02-Z 33W C+A Charger (white).

The Essager 33W Dual-Port Charger is a compact solution for fast charging of electronic devices. It uses GaN (gallium nitride) technology, which is responsible for its compact size while offering high performance. Thanks to the ports (USB-C and USB-A), it is possible to charge two devices at the same time, with no loss in charging speed.

GaN technology and high performance

Thanks to GaN technology, the charger features higher energy efficiency and better heat dissipation, which contributes to its durability and safe use. GaN SOC optimizes the internal components, resulting in a smaller charger size while increasing performance.

33W fast charging

The charger supports fast charging at 33W, allowing it to charge an iPhone 15 up to 60% and a MacBook up to 50% in just 30 minutes. Compatible with fast charging protocols, including PD, QC, iP 2.4A, AFC, FCP, the charger provides fast power replenishment for many devices.

Advanced security features

The Essager charger is equipped with numerous protection systems, such as overcharging, overvoltage, overheating and short circuit

protection. A temperature control function ensures safe use, minimizing the risk of overheating the device during prolonged charging.

Trickle charge mode and compact design

In "Trickle Charge" mode, the charger automatically switches to a lower amperage when the battery reaches 80% charge, preventing overcharging. The compact and lightweight design makes it an ideal travel companion, and the 100-240V voltage support allows it to be used worldwide.
