Massage Gun Yunmai mini 2 YMFG-M356 (White)

Ref: 6974706560530

Yunmai Mini 2 Massager YMFG-M356 (White).

Relax after an intense workout or a long day. The Yunmai Mini 2 massager provides a pleasant massage and heat therapy for fast and effective muscle recovery. It offers 3 intensity levels and interchangeable heads that you will use for different parts of your body. In addition, it works for up to 600 minutes on a single charge and stands out for its quiet operation (43 dB).

Take care of relaxation

The device uses heat therapy to improve blood circulation and relieve muscle pain. It takes just 10 seconds for the massager to heat up to 42.5°C. In addition, the Yunmai Mini 2 effectively relaxes muscles and promotes muscle recovery with its high frequency of 3,000 rpm. You can also adjust the vibration speed at 3 levels. What's more, the YMFG-M356 will automatically turn off after 15 minutes for safety purposes.

Interchangeable heads

You'll find interchangeable heads that you can use depending on your body part. The flat head (mounted on the device) is suitable for massaging larger areas, such as the shoulders, lower back and legs. On the other hand, the head with tabs provides a deep massage and soothes sore muscles, while the round head will work well for the entire body. For hand and foot massages, use the conical head.

Up to 600 minutes of operation

Enjoy the long working time of the Yunmai Mini 2. The massager uses a 1500 mAh battery, which allows for about 600 minutes of uninterrupted operation. As a result, you can use the massager no matter where you are - at home, at work or traveling. You will renew the energy of the YMFG-M356 with the included USB-A to USB-C cable.

User-friendly

Yunmai Mini 2 is distinguished by its carefully refined design. The available heads were created from high-quality silicone, which eliminates the risk of skin irritation. Moreover, the product generates a noise level of 43 dB - it works quieter than a fan, so you can enjoy relaxation without worrying about annoying noise. In turn, the lightweight (383 g) design makes the device easy to use and store.
