

Deerma cordless blender DEM-NU90

Deerma cordless blender DEM-NU90

Ref: 6955578044434

Deerma DEM-NU90 cordless blender.

The Deerma DEM-NU90 combines the functions of a juicer and a thermal mug, offering up to 6 hours of cooling and thermal insulation. It is made of stainless steel and comes with two lids (for blending and drinking). The powerful motor reaches a speed of 18,000 RPM, ensuring reliable performance. The capacity of 300 ml allows you to prepare as much as 8 cups of beverage on a single charge. A double-click system protects against accidental activation, so you can enjoy your favorite drinks anywhere.

Cooling and insulation technology

The use of cooling and insulation technology keeps drinks hot/cold for 6 hours. Thanks to the stainless steel double wall and double vacuum technology, the mug effectively blocks temperature transfer, keeping your drinks fresh and tasting perfect. Now you can prepare both refreshing juices to cool down on hot days and hot drinks to warm you up during winter evenings.

Interchangeable lids

The Deerma DEM-NU90 cordless blender offers two interchangeable lids - a blending lid and a drinking lid. The former is equipped with steel blades that thoroughly blends ingredients, preserving their full flavor and nutritional value. The drinking lid, on the other hand, will prove reliable when traveling, ensuring that the temperature of the drink is maintained for a long time.

Safety and ease of use

The double-click system protects against accidental activation of the device and allows for hassle-free transportation. The blending process takes only 40 seconds, so you will quickly prepare a drink with the perfect consistency. When the cycle is complete, the device automatically shuts off, guaranteeing complete safety of use.

Efficient performance

Thanks to four reliable blades and a motor that runs at 18,000 RPM, the Deerma blender is capable of blending fruits and vegetables into a smooth, uniform mass in no time. The device works wirelessly - so you can enjoy full freedom of use anywhere.

Long working time

The 1500 mAh lithium battery allows you to prepare up to 8 cups of beverage on a single charge. The energy renewal time with a USB-C cable lasts 3 hours. This will efficiently prepare the blender for use again.

High-quality design

The stylish gradient design in shades of blue and pink stands out. The leak-proof design prevents leaks, and the small spout minimizes the risk of smearing makeup while drinking. The materials used in the production of the Deerma blender comply with RoHS standards - so you can delight in your favorite drinks without worry. The dimensions of the device are 91 x 91 x 200 mm, and it weighs less than 0.6 kg, so you can always have your favorite drinks with you.
