

Yeelight Sensor Plug-in Light

Yeelight Sensor Plug-in Light

Ref: 6924922203155

The Yeelight brand is part of the Xiaomi ecosystem.

Practical night light

Thanks to the practical Yeelight night light with dusk sensor, you will never again hit a piece of furniture when going to the bathroom at night. The lamp gently illuminates the room without glaring into your eyes. It will be perfect for a bedroom, hallway or child's room.

Automatic mode

Thanks to the built-in light sensor, the lamp detects ambient light, so when darkness falls, it turns on automatically. On the other hand, when the room is bright enough - it turns off to save energy.

Forget about the darkness

With the Yeelight night light, you can forget about the darkness. It's perfect for bedrooms, when you want to leave the room at night without waking up other household members, but also in the hallway, when you go to the bathroom and need soft lighting that doesn't glare at your eyes or arouse you. It is invaluable in children's rooms. You can enter your child's room without worrying about the light

waking them up.

Soft and warm light

The color temperature of the Yeelight night light is 2700K, which makes it shine with a soft, warm light. It allows you to fall asleep with a light intensity.

Economical

The plug-in sensor consumes minimal energy, as it uses less than 0.5W, which puts it on the shelf of some of the most energy-efficient nightlights.

Easy and convenient use

The plug-in light is universal, as you can use it in any room where there is an outlet.
