

Yeelight LED Lightstrip 1S (2m)

Yeelight LED Lightstrip 1S (2m)

Ref: 0608887786590

Go beyond the usual lighting schemes | Flexible LED strip | Many colours | Wi-Fi

Decorate whatever you want

Intelligent 1S tape will help you create an original atmosphere in your interior. You can control it with a dedicated Yeelight application, smart assistants or with a switch. Thanks to its flexibility, the tape can be installed wherever you need it. Behind the TV, around the picture, under the bed and in many other places. With tape you not only brighten up rooms but also decorate your home and create any climate you want.

Tough and durable

The mercury-free PU gel makes the LED strip adjust its shape to every form. It has an unusually flexible structure, which not only protects the LEDs of the tape, but also gives up during assembly, making it much easier.

Synchronise the music with the LED tape

With the YEELIGHT application you can combine the rhythm of music with light to create even better environment for fun.

Practical possibilities

You can turn the stripe on or off with a key, or change the colour with a longer press. A particularly convenient solution at night when you

cannot find your smartphone.

Integrate the stripe into the rest of the home lighting

The Yeelight 1S stripe can be integrated with other devices in the home thanks to compatibility with Apple HomeKit, Google Home, Amazon Alexa, Samsung SmartThings and Razer Chroma.

Amazing experience during the game

Yeelight's cooperation with the well-known manufacturer of Razer gaming equipment has resulted in successful integration with the Razer Chroma™ RGB system. As a result, you can enjoy a unique, immersive gaming experience, whose dynamics will be further enhanced by an extraordinary spectacle of lights.

Create an atmosphere

From blue to orange, from night to daylight. Use the pre-settings from YEELIGHT to give you quick access to many colours for different moods. You can also add selected compositions to your favourites. You can easily change the mood in your home by setting the temperature and light colour. Use stripe to create a romantic atmosphere wherever you want it. Choose from 16 million colours and enjoy a unique atmosphere, no matter what you do.

Combine stripes and create unique lighting

You can combine 1S stripes up to a length of 10m with the available extensions (Yeelight Lightstrip Extension 1m). You can also trim the stripes if you find that you need a shorter section at a particular location.

Easy to install

The adhesive tape on the back of the LED stripe is designed for easy assembly. The product is ready for installation - just remove the top of the tape and stick the diodes in the right place.
