

Yeelight LED Lightstrip Pro 2m

Yeelight LED Lightstrip Pro 2m

Ref: 6924922212560

The Yeelight brand is part of the Xiaomi ecosystem.

Intelligent Yeelight Lightstrip Pro LED Strip

Create a unique atmosphere for any occasion. Yeelight Lightstrip Pro is an addressable LED strip, which means that each LED can shine in a different color. Conveniently control the lighting with the Yeelight app and choose from 16 million colors. The product is compatible with Razer Chroma, Overwolf, Apple HomeKit, Samsung SmartThings, Google Assistant, and Amazon Alexa, and you can also control it with your voice. You can also adjust the length of the lightstrip to suit your needs - just cut it or connect it to a special extension cable (sold separately).

Many colors to choose from

Gathering with friends? A birthday party? How about a romantic dinner? Addressable LED lightstrip Yeelight Lightstrip Pro will help you create an unforgettable atmosphere in any situation. The device is equipped with advanced IC chips, so it can shine in many colors simultaneously. Using the app you can easily adjust the lighting to your expectations. With 16 million colors and about 100 customizable lighting effects, you are sure to find something for everyone! Note: customizable lighting effects are now also available in the Mi Home app.

Immersive gaming experience

The Yeelight Lightstrip Pro LED strip will also appeal to gaming enthusiasts. The product is compatible with gaming platforms such as Razer Chroma and Overwatch. This means that it can provide fantastic lighting effects tailored to the events happening on screen in real time. This will make you even more immersed in the gameplay and feel like the hero of your favorite title. You can also pair the LED strip with other Razer devices - such as mouse or headphones - for an even more engaging experience.

Wide compatibility - convenient control

The product is compatible with Google Assistant, Apple HomeKit, Samsung SmartThings and Amazon Alexa. So you can add it to the platform you use and manage your smart home from a single app. No more having to switch between programs! You also don't have to worry if you forget to turn off the lights before you leave the house - in this situation, just reach for your smartphone! Voice assistant compatibility also allows you to control the lightstrip with simple commands. With just a few words, you can turn the lights on or off without moving.

Easy operation with the flip of a switch

What else makes operating the lightstrip so easy? The device features a one-button switch that provides quick and convenient access to several key functions. Simply press it to turn the Lightstrip Pro on or off, and press and hold to change light colors. You can also choose from available effects. Simply press the button 2 times! Test, experiment and discover the most interesting settings for yourself.

Tailored to you

With the Yeelight Lightstrip Pro you can easily decorate selected rooms in your home. The length of the lightstrip is 2m. However, if you want, you can extend it to up to 10m. For this purpose you can use 1m extensions that are available for sale separately. Is the lightstrip a bit too long? That's no problem either - you can cut it to the desired length with scissors. All this allows you to easily decorate the wall behind the TV, bedroom, kitchen cabinets or desk. Note: remember that Lightstrip Pro should be cut only in the marked places.
