Ref: 6924922224709

Yeelight Ceiling Spotlight (one bulb) white

Yeelight Ceiling Spotlight YLDDL-0083 (1 bulb)

Yeelight Ceiling Spotlight will be perfect for modern arrangements. It is equipped with 1 bulb, the position of which you can adjust 350° horizontally and 90° vertically. It features a stylish design and allows you to adjust light parameters such as color temperature, brightness and color - more than 16 million shades are available to you! Its convenient remote operation is enabled by the Yeelight app. The device is also compatible with popular smart home management platforms such as Samsung SmartThings and Google Home.

Customize it to your needs

Do you want optimal lighting for a specific point in the room? Or do you want each bulb to shine at a different angle? With the Yeelight Ceiling Spotlight almost nothing limits you! The product is distinguished by its adjustable design, which means that you can easily adjust it to your expectations. You can rotate each bulb within 350°, as well as tilt it within 90°. Now you can easily take care of optimal lighting wherever you want!

As many as 16 million colors to choose from

Are you planning a movie night with friends? Or are you organizing a birthday party? The Yeelight Ceiling Spotlight will help you take care of the right atmosphere! The device allows you to freely adjust the color of the light - you can choose from more than 16 million colors.

Thanks to this you will easily create an unforgettable atmosphere during a romantic dinner, a house party and more!

Adjust brightness and color temperature

Want to further customize your lighting to suit the situation? Yeelight Spotlight will let you do that - it allows you to conveniently adjust the brightness of the light and its color temperature in the range of 2700-6500K. So you can optimally adjust it to your needs! Cold, bright lighting will help you focus - it will be an ideal choice for work or study. And if you want to relax after a challenging day, opt for a warm, slightly dim light.

Control via app or voice commands

Now you can control your lighting even more conveniently. All you need to do is install the Yeelight app, which allows you not only to turn the light on and off remotely, but also to change its color, for example. The Ceiling Spotlight also works with Google Assistant and Amazon Alexa assistants. So it is possible to control the lighting with simple voice commands! The device also works with the Samsung SmartThings platform. Gamers will also find something for themselves - the product is compatible with Razer Chroma RGB. So you can enjoy dynamic lighting effects tailored to the events of your favorite game!

Group control and smart scenes

Make managing your smart home easy. Yeelight Spotlight support group control. This is perfect if you plan to buy more devices - you no longer need to control each one separately! Group your bulbs together and use smart scenes to operate lighting throughout your home with a single click or command. Leaving for work? Now you can easily turn off the lights in all rooms. Or make the bulbs in the hallway, kitchen and living room turn on with one click when you return.

Choose the right option for you

Looking for the perfect light for your arrangement? Yeelight Spotlight will be an excellent choice! The product is available in 2 color versions - black and white. So you can choose one that will better fit into the decor of your chosen room. In addition, you can choose fixtures with 1, 2 or 3 bulbs. Spot lighting for a bedside table? A suitable light source for a spacious living room? Or maybe a few small devices for a dressing room? The possibilities are truly vast - with Yeelight you can easily create the arrangement of your dreams!
