

Smart Rooflight Yeelight P21

Smart Rooflight Yeelight P21

Ref: 6924922245230

Yeelight Rooflight P21 Smart Light Panel

Transform the dark, unused corners of your home into a bright and lively space with the Yeelight Rooflight P21! This smart light panel accurately replicates the color of the blue sky, creating artificial daylight that seamlessly blends into any interior. It offers brightness and color temperature adjustment, and its compatibility with popular voice assistants makes controlling it even easier.

Lighting Adapted to the Time of Day

Experiment with different lighting colors and find the perfect setting for you! The wide color temperature range from 1600 K to 8000 K allows for precise replication of natural light throughout the day. From the cool blue of midday to the warm orange of sunset, the choice is yours.

Natural Light in Your Home

Illuminate your interiors with natural light! Yeelight Rooflight P21 utilizes Forward Projection technology, combined with advanced optical lenses, to simulate sunlight at a 30° angle. This means you can enjoy the atmosphere of a sunny day in the comfort of your home, even on cloudy days.

Eye-Friendly Lighting

Every corner of your home will be perfectly lit with Yeelight Rooflight P21! Equipped with 15 LED diodes, it ensures even light distribution at a 26° angle. With a brightness of 2100 lumens, it provides intense, natural light that breathes life into any room. Moreover, its high CRI (Color Rendering Index) of $Ra \geq 94$ ensures that colors are faithfully represented.

Full Control at Your Fingertips

Now you can control your lighting without leaving your comfortable chair! The Yeelight Pro app allows you to adjust the lighting color and intensity with just a few clicks, transforming your space to suit your mood or needs. Yeelight Rooflight also works with smart voice assistants like Apple HomeKit, Google Home, and Amazon Alexa, enabling control with simple voice commands.
