Rojeco Cat Steam Brush (white)

Ref: 6975116294145

Rojeco fur grooming brush with steam function

Take care of your pet's fur and provide him with excellent grooming. You will be helped by a brush with a steam function, with the help of which you will not only thoroughly clean your pet's fur, but also improve its condition. The teeth, curved at an angle of 140°, guarantee high efficiency, and the transparent window makes it easy to control the amount of remaining water. The brush is also very easy to clean and generates negative ions that prevent your pet's fur from fluffing up.

Reliable grooming

The brush is equipped with 140° curved steel teeth, which allow for fast and thorough combing of fur, while being safe for the skin. In addition, the device can generate steam and negative ions to make your pet's fur even smoother, shinier and well-groomed.

Thoughtful design

Don't worry about the hassle of cleaning the brush. Just press a button to quickly get rid of tangled hair - it will be automatically slipped off. You can also easily keep track of the remaining water level in the device - the built-in transparent window allows you to do so.
