

Precision multifunction grinder 12V set 36 el. HOTO QWLDM002

Ref: 6974370801670

Precision multifunction grinder 12V set 36 el. HOTO QWLDM002 35000RPM

Precision multifunction grinder 12V set 36 el. HOTO QWLDM002 35000RPM

The HOTO QWLDM002 precision multifunction grinder is a tool created for those who value high performance and flexibility in operation. With a powerful brushless motor and adjustable speeds from 5,000 to 35,000 rpm, this grinder can perfectly handle a wide range of tasks such as cutting, carving, grinding, polishing, drilling and more. It is an ideal choice for both amateurs and professionals tackling a variety of craft projects.

Extensive accessory set

The set includes as many as 36 carefully selected accessories, which enable versatile use of the tool. Among them are a variety of bits and discs, so you can fine-tune the tool to meet your specific needs. Whether you're working on small details or need a powerful tool for larger tasks, this set is sure to meet your needs.

Long-lasting work without interruption

The HOTO QWLDM002 features a 3,000 mAh rechargeable battery that provides long work without frequent charging. This makes the tool ideal for longer projects where reliability and uninterrupted power are key. Thanks to the long-lasting battery, you can focus on executing your ideas without worrying about downtime due to power shortages.

Integrated LED lighting and precise control

The grinder is equipped with integrated LED lighting that provides excellent visibility in all working conditions. This allows you to perform your tasks with precision even in poorly lit areas. In addition, the infinitely variable speed control allows you to accurately adjust the speed to the type of work you are doing, increasing the efficiency and quality of each project.

Ergonomic design and comfort

Thanks to its ergonomic shape and non-slip coating, the HOTO QWLDM002 is comfortable to use, minimizing fatigue during longer work sessions. The lightweight design and compact size make the tool easy to maneuver, further enhancing comfort and precision during complex operations.
