BuddyPhones Cosmos Plus ANC Wireless Headphones for Kids (pink)

BuddyPhones wireless headphones for kids are equipped with noise cancellation, making them perfect for remote learning. Moreover, they will take care of the little ones' hearing for a long time, as they are very durable. Transporting and storing the headphones will be made easier by the case you will find in the set.

Headphones made for learning

The active noise cancellation feature that the headphones are equipped with will be perfect for studying or watching videos of online lessons. This mode blocks out distracting background noise, ensuring that your child no longer has to turn up the volume unnecessarily. The additional learning mode also allows you to isolate your voice from other sounds. This will ensure clear and crisp sound while learning. The headphones are also equipped with a microphone. All these features will help for full concentration and better productivity.

Convenience of use

You will delight in the sleek and modern design of BuddyPhones headphones and their functionality. They are wireless and supported by Bluetooth BT5.0, with a range of up to 20 meters. Using the two buttons on the side of the headphones, your child can easily turn on noise cancellation mode or learning mode, ensuring full focus while working.

Uninterrupted operation

The battery life of the headphones is very high, lasting up to 24 hours, so your child is guaranteed uninterrupted operation. In addition, you don't have to worry if you suddenly run out of battery, as the headphones have dual-connection capabilities. This makes it so that when you suddenly run out of power, you can also connect them with a cable.

Hearing protection

You no longer have to worry about the fact that your child is constantly wearing headphones. BuddyPhones are equipped with 3 different modes, so you can adjust them according to your child's age or environment. You can take advantage of the travel mode, which allows sounds up to a maximum of 94 dB, another, the baby mode allows listening up to a maximum of 85 dB, and the toddler mode up to max. 75 dB. In addition, they also have anti-allergenic ear pads, making them suitable for very sensitive children as well.

Safety

With BuddyPhones headphones you will ensure the safety of children. They will protect the hearing of the little ones, but also guarantee a durable casing, made of child-friendly materials. Moreover, you can recycle them.

Comfortable

Wireless headphones will ensure safe and comfortable use. They can offer you not only long connection distance or long battery life. In addition, they are compact as they are foldable. The set comes with a hard case, which will allow you to safely store the equipment and transport it more easily.
