Wired headphones for kids BuddyPhones School+ (yellow)

BuddyPhones School+ wired headphones for kids (yellow)

Does your child use headphones often? Does he or she use them to study, watch cartoons or listen to music? Be sure he or she doesn't overdo the volume and protect his or hers hearing from damage! BuddyPhones School+ automatically limit the volume to 85dB and are very comfortable and durable. They are also equipped with a high-quality microphone that will allow your child to actively participate in class.

Caring for the hearing of the youngest

Protect your child's hearing from damage. BuddyPhones School+ headphones automatically limit the volume to a maximum of 85dB - a safe level recommended by the WHO. This way you don't have to worry about anything. Now you can be sure that your child will not listen to music too loudly!

Comfort of use

Take care of your child's comfort. BuddyPhones are designed for long-term use - their soft, anti-allergenic earcups prevent sweating, and if necessary, they can be easily cleaned. What's more, the adjustable headband allows you to adjust the headphones even better to your child's needs, and their smooth surface means that if they get dirty, you can simply wipe them off with a cloth.

Detachable microphone

BuddyPhones School+ are perfect for online lessons. They are equipped with a high-quality microphone that will record your child's voice perfectly. It will also minimize unnecessary background sounds. This allows kids to actively participate in class or chat with friends!

Carefully considered design

The headphones are not only comfortable, but also very durable. They are not even intimidated by bending or bumping - don't worry that they will break quickly. They are also distinguished by their foldable design, so your child can comfortably take them with him or her on vacation or on a school trip. Their transportation is made easier by the included case. In the package you will also find colorful stickers and DIY stickers with which you can decorate the headphones.

Even more conveniences

The BuddyPhones School+ microphone cable comes with a convenient-to-use button that your child can use to quickly answer the phone. It also offers a special jack connector with an extra port that allows you to connect an additional pair of headphones to the device of your choice. A standard audio cable is also included. If the microphone is not needed by your child for a while, simply replace the cable!
