Open-Ear Earphones Transformers TF-T20 (silver)

Ref: 6975472797328

TWS Transformers TF-T20 earphones (silver)

The TWS Transformers TF-T20 earphones are ideal for those who value comfort and safety during activity. Thanks to the open ear design, the equipment does not clog the ears, allowing air to flow freely, reducing the feeling of isolation and allowing you to hear ambient sounds. The solution used allows you to keep in touch with your surroundings, which is especially important when running or cycling. The 16.2mm drivers provide an exceptional music experience, while Bluetooth 5.4 is responsible for a stable connection. The operating time with the charging case reaches 60 hours.

Delightful sound

With 16.2mm drivers, the TWS Transformers TF-T20 earphones amplify the depth of the bass and bring out the best in every song for richly detailed stereo sound. Enjoy crisp sound whether you're listening to music, playing games or watching movies.

Ergonomic design

The TF-T20 is designed for maximum comfort. The ergonomic shape and lightweight design ensure a perfect fit for different types of ears. The earphones offer an ear grip that ensures they stay in place even during intense movement, making them an ideal choice for sports enthusiasts. In addition, they are IPX5 waterproof - so you can use them freely during intense workouts. It's up to you whether you want to use both earphones or just one at any given time.

Awareness of your surroundings and freedom of communication

With Transformers earphones, you can enjoy the ability to listen to music and record ambient sounds at the same time. This means you don't have to take off your earphones to hear what's going on around you or talk to those around you, making communication much easier and safer in a variety of situations.

Two operating modes

There are 2 modes of operation (Music and Gaming), so you can enjoy high quality sound both when listening to music and playing games. The ability to quickly switch between modes ensures an optimal sound experience depending on your current needs.

Bluetooth 5.4

Bluetooth 5.4 technology provides a 200% increase in data transfer speed compared to previous versions, as well as improved connection stability (by 50%). After the first pairing, the equipment automatically connects to the selected device. A latency of only 30 ms translates into smooth audio transmission, which is especially important during gaming. The earphones support protocols such as HSP, HFP, A2DP and AVRCP and are compatible with various iOS, Android and Windows-based devices.

Fast charging and long runtime

One charge provides 5 to 6 hours of music playback. The 300 mAh case allows the earphones to be charged four times and extends the total runtime to 60 hours. Charging via the USB-C port takes just 2 hours. As a result, the TF-T20 is an excellent choice for those with active lifestyles.

Intuitive operation

The earphones' touch panels allow you to conveniently manage incoming calls, control the music player, adjust the volume and activate voice assistants and modes. This way you don't have to reach for your phone every time.

Included:

TWS Transformers TF-T20 earphones
Charging case with drop protection cord
