1MORE S51 FIT OPEN wireless headphones (black)

1MORE S51 FIT OPEN wireless headphones (black)

1MORE S51 FIT OPEN are extremely lightweight and comfortable headphones designed for active people who value both comfort and high quality sound. Each earphone weighs just 9g, making them almost imperceptible when worn. In addition, the open design additionally allows you to stay in touch with your surroundings, which increases safety, for example, when running in the city.

High quality sound

1MORE S51 FIT OPEN are equipped with advanced carbon diaphragms that increase acoustic performance by 42%. As a result, the sound is clear, with crisp detail, which will satisfy music lovers alike. Support for the AAC and SBC codecs guarantees excellent low-end reproduction, while providing well-balanced mid and high frequencies. What's more, the low latency of 0.08 seconds ensures perfect synchronization of sound and video, which will be especially appreciated by gamers.

Long runtime and fast charging

The headphones allow you to play music for 11 h continuously on a single charge. With the included case with a built-in 575 mAh battery, this time can be extended up to 40 h. This is especially convenient for people who travel a lot or do not have the opportunity to charge the device frequently. What's more, the charging process is very efficient - the headphones need only 60 min to charge fully, while the case charges in 90 min.

Advanced noise cancellation

The 1MORE S51 FIT OPEN headphones are also perfect for phone calls thanks to advanced ENC AI technology. The built-in four microphones effectively reduce ambient noise, allowing you to have clear and relaxed conversations even in noisy environments. Whether you're using them for work or communicating with loved ones, you can count on crisp, clear sound and minimal interference, greatly enhancing your conversational experience.

Stable connection

The 1MORE S51 FIT OPEN headphones use Bluetooth 5.3, which provides a stable connection of up to 10 meters. As a result, you can enjoy freedom of movement without the risk of losing the connection. In addition, the dedicated app allows you to personalize the sound settings and other features of the headphones, so you can customize them.
