Ref: 6975116294671

Rojeco 4L Automatic Pet Feeder WiFi Version with Double Bowl

Rojeco 4L Automatic Pet Feeder WiFi Version with Double Bowl

Spend time out of the house knowing that your pet is eating all his meals regularly. The Rojeco smart food dispenser provides a capacity of up to 4 liters, and you can control its operation from a dedicated app. It is equipped with 2 bowls made of high-quality stainless steel and is resistant to clogging with grains. The device supports both Bluetooth and Wi-Fi connectivity, and you can power it in 2 ways - with 4 AA batteries or using a USB cable. Among other things, the kit includes an EU adapter.

Capacious and reliable

The Rojeco smart food dispenser offers up to 4 liters of capacity and ensures access to fresh and dry food. Why choose it? Thanks to an innovative system and the use of a soft rubber to mix the grains, the device ensures trouble-free feeding. In addition, it is equipped with a built-in sensor that monitors the level of food and automatically notifies you when the tank needs to be refilled.

Always fresh food

The silica granule desiccant keeps food dry and protects it from moisture, so your pet will enjoy top-quality food at every meal. It is recommended to replace the desiccant every six months.

Remote management of feeding times

Create a food schedule according to your pet's needs. From the app, you can set the number of meals for the day, as well as customize the amount of food and the times at which the food is to be served. This allows you to go on a trip and spend time outdoors without worry. In addition, you will ensure that your furry friend is fed regularly, which will have a positive effect on his health. The maximum number of meals per day is 10 - each serving is 6 g.

High-quality workmanship

The food bowls are made of the highest quality 304 stainless steel, which translates into durability and resistance to fat accumulation. Keeping it clean is easy, and you don't have to worry about the appearance of unsightly stains. In addition, the dispenser provides a child lock safety feature that prevents accidental opening of the lid. The device also features a manual feed button, which allows you to reward your pet with a snack at any time. The non-slip design provides additional protection against accidental slipping. All this to keep your pet comfortable and safe!

Emergency power system

Have confidence that your pet will not go hungry in your absence. The Rojeco dispenser uses an emergency power system. How does it work in practice? The device automatically enters battery power mode in case of loss of access to power or power failure. Note: the device requires 4 AA batteries, which are not part of the kit and must be purchased separately.

Hassle-free disassembly and cleaning

Maintenance of the dispenser will not cause you any trouble. You can conveniently disassemble the reservoir, its lid, base and bowl, and then wash the individual components to ensure your beloved pet's hygienic conditions during meals.
