Vention KUBT0-20 protective case for iPhone 14 Plus (transparent)

Vention KUBT0-20 protective case for iPhone 14 Plus (clear)

The Vention case is the perfect combination of functionality and protection, created specifically for iPhone users. Its transparent design ensures visibility of the device's original design while protecting it from damage. With support for MagSafe, the case works perfectly with wireless chargers, holders and magnetic accessories. It's the perfect compromise between convenience and security!

Full compatibility with MagSafe

With 38 built-in powerful magnets, the N52 case provides a stable connection with MagSafe accessories. Magnetic power in the 8N-9N range guarantees a firm grip on the device and prevents accidental disconnection. This is ideal for those who use wireless chargers, powerbanks or magnetic holders.

Protection at the highest level

The case is made of a combination of polycarbonate (PC) and thermoplastic polyurethane (TPU), which provides excellent protection against drops, scratches and everyday wear and tear. Its three-layer construction, with raised bezels around the screen and camera, further protects the most delicate parts of the phone from mechanical damage. Additional "air cushions" on the corners absorb impact energy, minimizing the risk of screen cracking.

Precise cutouts and full functionality

The Vention case was designed with attention to the smallest details. Precise cutouts ensure easy access to all ports and buttons, while sensitive "clicky" buttons provide comfort without the need for extra pressure.

Style and comfort

In addition to excellent protection, the Vention case maintains a slim profile, so the phone doesn't appear excessively thick. Slightly rounded edges and a matte texture provide a secure grip, which translates into everyday comfort. In addition, the use of high-quality transparent material ensures that the phone always looks neat, and the case does not yellow over time.
