Ref: 6922794788046

Vention KUKTCC-20 tempered glass for iPhone 15 Plus +applicator

Vention KUKTCC-20 tempered glass for iPhone 15 Plus + applicator

The Vention tempered glass is an excellent choice for users who want to provide their iPhone with maximum protection without compromising on aesthetics and convenience. The product provides the highest level of scratch and damage resistance, while guaranteeing perfect clarity and child's play installation.

Reliable screen protection

The 9H hardness tempered glass is scratch and impact resistant, protecting your iPhone's screen from everyday hazards such as falls or contact with keys in your pocket. Its thickness of just 0.33 mm makes it virtually invisible, without affecting touch sensitivity or display quality.

Precise fit and easy installation

Thanks to an advanced CNC process, the glass fits perfectly to the shape of the iPhone, providing full edge-to-edge protection. It comes with an applicator that allows precise application of the glass without the risk of air bubbles. In addition, the integrated design prevents dust from getting under the glass surface during installation.

Excellent transparency and dirt protection

Mobilemax - Gadgets and Accessories

The glass provides 95% high transparency, allowing you to enjoy the full color spectrum and clarity of the display. The special AF (anti-fingerprint) coating protects the screen from smudges and fingerprints, making it easy to clean and keep it in perfect condition.

Special protective features

The glass is equipped with edge-lift prevention technology, so it adheres well to the screen and does not tend to come off. In addition, the glass has dust protection for the speaker, allowing you to enjoy clear conversations without interference from accumulated dirt.
