Battery for scooter LEFEET C1

The LEFEET C1 scooter battery is an indispensable piece of equipment for any lover of water adventures. The product weighs just 800 g and features a charging voltage of 25.2 V, a current of 3 A and a rated capacity of 4,500 mAh, which translates into a rated energy of 97.2 Wh. The time it takes to renew its energy is about 2 hours. Make sure your scooter is fully ready and enjoy every moment you spend on the water.

Fast charging and safety

It only takes two hours to charge the LEFEET battery. This will help you quickly prepare your scooter for reuse and spend more time on the water. An easy-to-read charging indicator lets you know the status of the process. A red light indicates that charging is in progress. Green, on the other hand, indicates that 100% charging has been reached. The process takes place at temperatures ranging from 0°C to 40°C, which minimizes the risk of overheating. In addition, precision-designed mounting mechanisms prevent improper attachment, which increases safety when using the scooter.

Ease of installation and durability

With orange buttons to push, the battery installation process is smooth and hassle-free. A clicking sound when the cover is closed confirms proper attachment. High-quality materials are used in the production of the battery to ensure damage resistance and

long-lasting performance.
