Superfire G19-S flashlight

The Superfire G19-S flashlight is distinguished by its high functionality and will perform perfectly in all conditions. Its compact design combines durability with multiple lighting modes, making it an ideal choice for both professionals and outdoor enthusiasts. Made of damage-resistant aluminum alloy, it provides a reliable source of light in any situation.

Rugged construction

The Superfire G19-S features a robust housing made of high-quality aluminum alloy, making it resistant to drops and mechanical damage. This design ensures long life and reliability even in the toughest conditions. The flashlight is also lightweight and easy to carry, making it ideal for carrying in a backpack, on a belt or in a pocket. The device's housing has been additionally protected from water, allowing it to be used in the rain or during other adverse weather conditions.

It will serve as a headlamp

The G19-S flashlight offers flexibility of use thanks to the ability to adjust the head to a 90 angle. This allows the flashlight to be used as a handheld or as a headlamp, adding convenience and functionality to a variety of tasks. Whether you're fixing something in the workshop or traversing rugged terrain, the G19-S provides reliable illumination in all conditions. The magnetic tip allows you to easily attach the flashlight to metal surfaces, which is extremely useful for work that requires the use of both hands.

Powerful light source

The Superfire G19-S is equipped with high-quality LEDs that provide powerful and bright light. The device offers 5 lighting modes: High, Medium, Low, Strobe and SOS. Each mode is easily accessible through an intuitive switch, allowing you to quickly adjust the flashlight's operation to suit your current needs. The ability to adjust light intensity makes the G19-S ideal for a variety of applications, from everyday use to specialized tasks in harsh environments.

Efficient power supply and USB-C charging

The G19-S flashlight is powered by a high-performance, replaceable 14500-type lithium-ion battery that provides long runtime on a single charge. Thanks to the USB-C port, charging the device is fast and convenient, allowing charging with powerbanks, computers or car chargers. The flashlight has a battery status indicator - a red light indicates charging, and a blue light indicates full charge - which minimizes the risk of unexpectedly running out of power. This feature is particularly useful on long trips where access to a power source may be limited.

Safety and security

The G19-S is equipped with advanced safety features that protect the flashlight from damage associated with misuse. The device has protection against reverse polarity, over-discharge, over-charging and an automatic shut-off function when the voltage is low. In addition, the flashlight is designed to conserve energy, increasing its efficiency and battery life. These advanced safety features make the G19-S a reliable choice for those in need of a robust and safe light source.

Included

flashlight
headband
battery
charging cable
wristband
