PGYTECH Air Strap shoulder strap (Modern Art design)

PGYTECH Air Strap Shoulder Strap (Modern Art design)

The PGYTECH Air Strap shoulder strap is ideal for photography enthusiasts. It was designed for maximum durability, so materials such as polyester, TPE and reinforced 600D nylon were used in its production. Thanks to this, the carrying capacity of the accessory is up to 90 kg. Its length can be adjusted on both sides from 1000 to 1400 mm. If necessary, you will efficiently detach the camera. Now you can enjoy quick access to your device and free your hands to comfortably enjoy the scenery.

Wearing comfort

Comfort is ensured by shoulder pads made of automotive-grade Menorca® microfiber and TPE material, which guarantee comfort even when carrying your equipment for long periods of time. The material used is skin-friendly, so you don't have to worry about the occurrence of irritation. Ergonomic features, such as a one-sided TPU ring for oblique wear and easy storage, make the strap highly functional.
