

X-Sense XC01-M Link+ Pro CO Sensor

Ref: 5906168434969

X-Sense XC01-M Link+ Pro CO Sensor

X-Sense XC01-M Link+ Pro CO Detector.

The X-Sense XC01-M Link+ Pro provides the highest level of protection against the threat of CO poisoning. The device offers reliable performance thanks to its high-precision electrochemical sensor and its ability to wirelessly connect to other alarms on the network. As a result, when one sensor detects a threat, all connected units will be activated, increasing security throughout the home.

Precise measurement and memory of the highest CO concentrations.

The XC01-M is equipped with a highly sensitive electrochemical sensor that immediately detects the presence of carbon monoxide in the air. An easy-to-read LCD display shows current CO concentrations, and a memory function saves the highest recorded levels, allowing you to monitor pollution levels even in your absence.

Network up to 24 connected devices

The XC01-M sensor can be part of a network of up to 24 (mask.) Link+ Pro devices that work together to enhance security. If one sensor detects a threat, all alarms in the network will be triggered immediately. The system is ideal for larger homes and facilities.

Test and control through the app

With the mobile app, you can test the sensor's performance at any time without moving from your location. This feature eliminates the

need to use a ladder to manually test the device, which is both convenient and safe. The app will also notify you of low battery or other important events.

Powerful alarm with a volume of 85 dB

When the concentration of carbon monoxide exceeds a safe level, the sensor emits a loud 85 dB alarm. This sound is loud enough to alert all household members, even when they are in another room.

Long life and easily replaceable batteries

The XC01-M offers a lifespan of up to 10 years, which means you'll be able to enjoy protection for a long time without having to replace the device. The device is powered by a replaceable CR123A or CR2/3A battery for long-lasting performance, and low power levels are indicated on the display and through in-app notifications to avoid unexpected interruptions.

Included

CO sensor (with pre-installed battery) × 1 screws × 2 wall plugs × 2 instruction manual × 1

Manufacturers X-Sense Model XC01-M Link+ ProPower supply CR123A or CR2/3A (replaceable battery) Product lifetime 10 years Sensor type Electrochemical Safety standard EN 50291-1:2018 Operating temperature 4,4-37,8°C Humidity during operation 10%-85% relative humidity (non-condensing) Alarm volume ≥ 85 dB at 3 m (10 ft) @ 3.2 ± 0.3 kHz pulse alarm Storage and transport conditions -20-60°C (-4-140°F), 5%-95% relative humidity (non-condensing) Silence duration Approximately 9 minutes Operating frequency 868 MHz Maximum number of connected units 24 wireless units (compatible with X-Sense Link+ alarms only)
