

X-Sense SBS50 base station

X-Sense SBS50 base station

Ref: 5906168435003

X-Sense SBS50 base station

The X-Sense SBS50 is the centerpiece of your home security system, allowing you to monitor and manage your sensor network in real time. With the ability to connect up to 50 devices and support for the X-Sense Home Security mobile app, the base station allows convenient access to alerts and notifications from anywhere. It's ideal for homes that require an extensive protection system against fire, carbon monoxide and other threats. Enjoy peace of mind every day!

Advanced device connections

The SBS50 supports up to 50 devices, allowing you to create a comprehensive security system. You can connect a variety of sensors, such as smoke detectors, carbon monoxide detectors and heat detectors, providing complete protection for every room in the house. Thanks to its wide wireless transmission range, the base station can easily handle even large properties.

Loud alarm and visual notifications

The base station is equipped with a loud 100 dB alarm that alerts you to a threat as soon as any sensor in the system detects a problem. In addition, you can receive notifications to your mobile devices with the X-Sense Home Security app. This allows you to respond quickly, no matter where you are.

Monitoring and management through the app

With the mobile app, you can also remotely monitor your security system, receiving notifications about sensor status, battery levels and other important parameters. The app supports both Android and iOS, allowing for broad compatibility. Note: the base station operates at 2.4 GHz.

Easy installation and operation

The X-Sense SBS50 base station is very easy to install, thanks to the included accessories. All you need to do is connect the device to power and pair it with the sensors in your home. The simple installation means you can quickly start using the system and enjoy peace of mind knowing your home is properly protected.
