PowerLocus Bobo wireless headphones for kids (blue)

PowerLocus Bobo are wireless headphones designed with children in mind. They offer three levels of volume limitation to protect little ones' hearing from damage. At the same time, they provide great sound quality and support fast, stable Bluetooth 5.3 connectivity. Their additional advantage is the colorful backlighting, which is sure to appeal to many little music lovers.

Three safe volume limit modes

The headphones offer a volume-limiting function to effectively protect children's delicate ears. You can choose from three modes - 74 dB for little ones, 85 dB for learning and 94 dB for travel. This ensures that little users can always listen to music or watch cartoons in the right conditions. With PowerLocus, you gain more control over how your child uses the headphones!

Unique design

The original, charming design of the headphones is likely to appeal to many children. The distinctive colors are eye-catching, and the colorful LED lights allow them to stand out from the crowd. And if need be, you can turn off the backlight at any time by pressing a single button.

Reliable Bluetooth 5.3 connection

Bobo headphones work wirelessly. So kids can comfortably listen to music, watch cartoons or play games - without restrictive cables! What's more, Bluetooth 5.3 technology ensures a fast and stable connection to devices - don't worry about delays and other signal problems. You can also connect your headphones using the included audio cable.

Comfort and durability for years to come

The Bobo model is made of durable BPA-free materials, ensuring complete safety and durability. Soft, skin-friendly cushions and an adjustable headband ensure a comfortable fit, while the earcups that rotate 90° adjust to the shape of a child's head, offering maximum comfort even during prolonged use. In addition, the headphones are foldable, and the set includes a practical carrying case, allowing them to be transported effortlessly. They will work great both at home and while traveling!

Built-in microphone

The headphones are equipped with a high-quality microphone, which allows children to talk freely, for example, while playing or studying online. This allows the little ones to talk comfortably with their parents, grandparents or classmates.

Wide compatibility

The Bobo model is distinguished by its wide compatibility, so it will be an ideal choice for children using different platforms. You can easily pair it with a phone, tablet, laptop or game console, among others, for flexibility and convenience in everyday use. Also included is a special adapter that allows you to connect two pairs of headphones to one device. This allows children to listen to music or watch cartoons together with their siblings or colleagues!
