Yeelight W3 smart light bulb (color)

Create a unique atmosphere with the Yeelight W3 Smart Light Bulb (color), which allows you to freely adjust light parameters such as brightness, temperature, and even color. Compatible with Google Assistant and other platforms - its operation is fabulously easy and fun. You can also sync it with your music and even your favorite PC game thanks to Razer Chroma integration. The W3 is also energy efficient with less than 0.5W of power consumption in standby mode. Thanks to the use of new technologies and improved solutions, the bulb has a wide range of possibilities known from the 1S model, offering an even more attractive price.

Unique lighting for any occasion

The Yeelight W3 (color) intelligent light bulb will shine exactly the way you want it to. Adjust the brightness of the light and its color temperature to your needs. Choose from 16 million colors to create a unique atmosphere for any occasion - a holiday dinner, family reunion, movie night with friends, or a romantic date? With W3 you can create the right atmosphere in any situation.

Even more immersed in the world of your favorite game

The product is compatible with Razer Chroma and Overwatch gaming platforms. This makes it possible to synchronize the bulb with specific games, allowing you to enjoy fantastic lighting effects triggered by the events unfolding on screen. Try out this feature and give yourself a whole new and unforgettable experience. With Yeelight, you can enjoy an even more immersive gaming experience!

Fantastic party solution

Planning a house party? W3 (color) has something special for you! With the music-synchronized lighting feature, you can create an even more magnificent atmosphere - the light effects that change with the music will provide you and your guests with incredible entertainment. Dance and watch the lights dance with you!

Enjoy simple and convenient operation with the Yeelight app

Built-in Wi-Fi and the Yeelight app allow you to install the bulb quickly. You don't even need to use additional hubs or drivers. The whole configuration process is extremely simple - you will easily deal with it. However, this is not the end of the possibilities offered by the application. With its help you can remotely control your bulbs - turn the light on or off, as well as set the work schedules. You can also use a number of available scenes and even create your own.

Remote control with your intelligent assistant

That's not all! Yeelight W3 (color) is compatible with Google Assistant, Amazon Alexa, IFTTT and Samsung SmartThings. Add it to the system you use every day and conveniently operate all your smart devices from a single app. You can also use your smart assistant to control the light bulb by voice - with just a few simple words, you can conveniently turn the light off or on without moving from your couch!

Control multiple bulbs simultaneously

Want to use more than one Yeelight bulb? We have great news for you! W3 allow group control, which means you don't have to turn on and adjust each unit individually. Create a group using the app - once you do, it only takes a few clicks or a simple voice command to operate multiple bulbs simultaneously.

Your new way to save money

The environmentally friendly Yeelight W3 (color) bulb is also incredibly energy efficient. In standby mode, it consumes only about 0.3 watts. You no longer have to worry about your electricity bill being too high. Yeelight uses optimized electronics to enable you to save energy and therefore money.
