

Lampka nocna z sensorem ruchu Yeelight Sensor NightLight

Ref: 6924922217114

Lampka nocna z sensorem ruchu Yeelight Sensor NightLight

Three mounting options | Rechargeable via USB cable | 120 days battery life | Light and motion sensors. Note, EAN code has changed.
Style design

The timeless design makes the lamp easily fit into any interior, and the Fresnel lens and light sensor, will provide a pleasant and gentle illumination of the room at night.

Practical solutions

Remove the handle and hang it anywhere - in the closet, on the stairs, by the bed or in the hallway. You can conveniently change its location without having to connect wires, and thanks to the bottom with self-adhesive tape, you'll ensure a stable mount wherever you desire.

Light the way to the refrigerator

The magnet located on the back of the light, will allow you to easily hang it on the refrigerator or any metal surface.

Durable bfabric

High-quality 750 mAh lithium battery provides up to 120* days of lamp life with a single charge. Keep yourself busy without worrying about constantly charging your device. *According to Yeelight Lab testing, the battery lasts 120 days if not used in daylight mode more than 15 times per day for 20 seconds. The infrared sensor detects motion within a range of 5-7 meters, spanning 120 degrees. When motion is detected in the dark, the light automatically turns on and goes off after 15 seconds.

Handy

Switch the device to "On" mode to keep it lit continuously. Take it with you where you need it and use it as a flashlight. With no glare, it will help you find your way around the house with ease.

Delicate

Emitted warm light provides a soft, pleasant glow. The gentle illumination will not disturb the sleep of the rest of the household and will not irritate sleepy eyes, and will only gently brighten the darkness.
