

## Filters PolarPro Directors Kit for DJI Mavic 3 (9-Pack)

Filters PolarPro Directors Kit for DJI Mavic 3 (9-Pack)

Ref: 817465027622

PolarPro Directors Kit 9 Filters for DJI Mavic 3

Create even more stunning aerial photos and videos. The kit includes 9 dedicated PolarPro brand filters for the DJI Mavic 3 - VND 2-5, VND 6-9, Mist [1/4], BlueMorphic, GoldMorphic, CP, ND8/PL, ND16/PL and ND32/PL. They are made of high-grade German CinemaSeries Glass, which ensures color neutrality and low refractive index. The aluminum AirFrame 4.0 is extremely durable, yet lightweight - it will not affect the flight quality of your drone in any way. The filters come in a practical box for easy transport and storage.

Take your best shots

With the help of the filters included in the set, you can easily take the perfect shot. The VND filters allow you to reduce the shutter speed and give you control over the light even in extremely bright environments. The Mist filter with a 1/4 diffusion level ensures superb color and contrast reproduction and allows you to give your images a cinematic feel without losing sharpness. With the CP filter, you can capture vivid, deep colors and eliminate flare, haze and reflections. With the GoldMorphic filter you'll get golden flashes and with the BlueMorphic filter you'll get blue flashes. This is a fantastic solution if you want to avoid the decompression in post-production that would be necessary when using anamorphic lenses. ND/PL filters allow you to reduce reflections, increase light transmission, shorten shutter speeds and create interesting blur effects. They provide clear, detailed images with vivid colors.

Brand

PolarPro

Model

MVC3-DRCT-CLLTN

Type of filters

VND 2-5, VND 6-9, Mist [1/4], BlueMorphic, GoldMorphic, CP, ND8/PL, ND16/PL, ND32/PL
