

Insta360 X3 removable camera lens covers

Insta360 X3 removable camera lens covers

Ref: 6970357857906

Insta360 X3 removable camera lens covers

Insta360 X3 camera lens covers provide excellent protection for your camera's lenses from mechanical damage. Designed for a perfect fit, they provide an effective shield that protects your lenses from scratches and dings while not affecting the quality of your images. Note: due to the unsealed design, it is recommended to avoid using the lens covers in water or rain.

Perfect fit

The lens covers are carefully designed to fit perfectly over the lenses of the Insta360 X3 camera, providing maximum protection without any play. Precision craftsmanship ensures that the camera's lenses remain intact, and that photos and videos are clear and detailed.

Sharp, detailed shots

The covers are made of multi-layer acrylic (PMMA), which provides crystal clear images and protects against scratches. So you can enjoy sharp, detailed 360 shots without worrying about image deterioration.

Easy installation and removal

Removing and attaching the lens hood is extremely easy thanks to its twist-off design. The stand, which remains attached to the camera, provides a secure and stable mount. The entire installation and removal process is quick and hassle-free, allowing you to comfortably use

the camera in any situation.
