Etui Nillkin Super Frosted Shield Pro iPhone 16 (czarny)

Nillkin Super Frosted Shield Pro Case iPhone 16 (black)

The Nillkin Super Frosted Shield Pro Case for iPhone 16 (black) is the perfect combination of aesthetics and functionality. Using injection molding technology and the highest quality materials, the case provides comprehensive protection for your phone. Its elegant design with a matte finish not only looks great, but also makes using the case extremely comfortable.

Durable design with dual protection

The case is made of two materials: rigid PC (polycarbonate) and soft TPU, which together offer exceptional protection. The rigid PC plastic protects the phone from mechanical damage, while the flexible TPU edges absorb shocks, making the case perfect for protecting your iPhone from drops. Additional bumpers on the corners strengthen the protection and provide additional cushioning.

Functional dirt-resistant surface

Using UV painting technology, the Nillkin Super Frosted Shield Pro case has a pleasant-to-touch matte surface that is resistant to dust, fingerprints and other dirt. The structure with anti-slip tabs prevents the phone from accidentally slipping out of your hand, making it safer for everyday use.

Precise fit and full functionality

The case is designed to fit the iPhone 16 perfectly. Precise cutouts for ports and buttons ensure that the phone retains full functionality, and access to all functions is easy and intuitive. With such a precise fit, your phone is fully protected while still being comfortable to use.
