

Filter VND 2-5 PolarPro GoldMorphic for Mavic 3

Filter VND 2-5 PolarPro GoldMorphic for Mavic 3

Ref: 817465027578

PolarPro VND 2-5 GoldMorphic filter for DJI Mavic 3

Create even more stunning aerial photos and videos. Designed for the DJI Mavic 3, PolarPro's VND 2-5 GoldMorphic filter is made with premium German CinemaSeries Glass for color neutrality and low refractive index. The AirFrame 4.0 aluminum frame is extremely durable, yet lightweight - it won't affect your drone's flight quality in any way. The filter features a VND range of 2-5 degrees and allows you to create a golden flare effect in your photos. This is a great solution if you don't want to use anamorphic lenses and you want to avoid decompression in the post-production process. The accessory comes in a practical package for easy storage and transportation.
