ESR Qi2 mini wireless charger (HaloLock) (black)

The ESR Qi2 mini (HaloLock) charger is a compact but powerful solution for fast charging of your iPhone. With Qi2 technology and 15 watts of power, it allows you to replenish your iPhone 15 Pro Max up to 83% in just 2 hours, twice as fast as with standard chargers. It's the perfect option for those who value efficiency in their daily lives.

Exceptional durability and reliability

The ESR Qi2 mini cable is reinforced with braided heavy-duty nylon and has a reinforced termination, ensuring its durability even under heavy use. Endurance tests have shown that it is resistant to bending and stretching, making it reliable.

Strong magnet

The magnetic connection of the Qi2 mini charger features a pulling force of 1,200 gf, which guarantees a secure and stable hold on the phone during charging. This makes the whole process safe and smooth.

Long cable for freedom

The Qi2 mini charger comes with a 1.5-meter long cable, giving you plenty of freedom when charging. Whether you use your phone on the couch or at your desk, the long cable provides convenience without the need to sit close to a power source.

Compatible solution

The ESR HaloLock charger is compatible not only with iPhones, but also AirPods Pro, offering versatility and convenience. With Qi2 certification from the Wireless Power Consortium, the device is compatible with the latest iOS updates, ensuring compatibility, power efficiency with minimized risk of overheating, and therefore charging safety.
