

Filter VND 6-7 PolarPro LiteChaser Pro for iPhone 13 / iPhone 14

Ref: 817465027240

Filter VND 6-7 PolarPro LiteChaser Pro for iPhone 13 / iPhone 14

PolarPro LiteChaser Pro VND 6-7 Filter for iPhone 13 / iPhone 14 (Pro / Pro Max)

The VND 6-7 filter by PolarPro is designed for the 0.5x, 1x and 3x cameras of the iPhone 13 / iPhone 14. It is distinguished by its small size and durable construction - the aluminum frame is extremely lightweight, yet resistant to damage. The accessory is compatible with FILMiC Pro and Moment Pro Camera apps, and has been designed to fit future smartphone models as well. Note: to use the filter, a LiteChaser Pro case designed for iPhone 13 / iPhone 14 is required.

Can accompany you almost anywhere

The accessory is ideal for filmmakers who create on the move and outdoors - it even fits easily in your pocket. Its safe and convenient transportation is possible thanks to the included case and protective cap Defender Mini. The laser-engraved indicators allow you to easily adjust the light reduction of 6-7 degrees. What's more, the filter is slightly darker than usual, which means less range but better results even in very bright light. You also don't have to worry about the so-called X pattern.
