Knife with breakaway blade JM-G12013

This multifunctional knife with a breakaway blade will be a very helpful tool in many situations. It can easily cut through plastic packaging, cardboard, aluminum, PVC flooring and PVC carpet. It is made of ABS plastic so it is lightweight and durable and there is room for spare blades inside.

Retractable blade

The blade is freely extendable. Just press the button on the bottom of the blade and slide it out towards the top. This is useful when the tip of the knife has become blunt or when you need a larger blade surface, e.g. when cutting mineral wool.

Sharp and comfortable

The manufacturer's factory knives are made from premium high-carbon steel and are divided into 8 breakable parts, so you get up to eight times as sharp as new. Cuts can be made in any space vertically and horizontally.

Extra blades plus

By removing the stopper from the bottom part you gain access to spare blades. The stopper additionally helps you break the tip of the knife effectively, even with work gloves on, minimizing the chance of injury.

Product:

Utility Knife

Model:

JM-G12013

Blade Size:

108×18×0.5mm

Blade Material:

SK2 High Carbon Steel

Handle Size:
