

Voltage Meter SkyRC LiPo Pal

Voltage Meter SkyRC LiPo Pal

Ref: 6930460001849

Voltage meter

SkyRC LiPoPal is a simple battery tester and voltage balancer. When flying outdoors, it is difficult to determine the remaining capacity of a battery. This small device allows you to check the voltage of each cell and determine the remaining charge by percentage anytime and anywhere. As we know, if the cells of the pack are balanced, the operation of the battery is much better and the life is longer. But sometimes we may not have the time or tools to balance the cell voltage. This small device, upon detecting the voltage imbalance, will immediately start balancing them.

Included

LiPoPal

Adapter

Hand strap

□Weight

□23 g

□Dimensions

□70 x 38 x 11 mm

□Accuracy of voltage measurement

□0,01

□Displayed voltage range

□0-5 V

□Balancing current

□50 mA

Price:

€ 23.51
