

Wireless Slim Keyboard Delux SK800GL 2.4G Silent RGB

Ref: 6938820413721

Wireless Slim Keyboard Delux SK800GL 2.4G Silent RGB

Delux Wireless 2.4G Silent Keyboard Slim SK800GL

The Delux SK800GL is a functional keyboard that focuses on comfort in its design. It is extremely quiet in operation, and the RGB backlighting gives it a modern feel. The powerful power supply allows you to work for up to a month on a single charge, and the stable 2.4G band connection ensures a reliable and smooth usage.

Functional design

The keyboard has a full 104-key layout, but is still extremely compact. What's more, it offers access to 12 function keys for multimedia control. Plus, it's extremely quiet, producing up to 90% less noise than a conventional office keyboard. All for your comfort!

Modern style

The device uses dynamic RGB backlighting for a very modern look. The illumination mode can be either constant or pulsating. All settings can be changed at the touch of a button.

Powerful power supply

The keyboard draws its power from a durable 1100 mAh battery. That gives you up to a week of use on a single charge with the backlighting on. Without it, you can use the device for about a month. What's more, the device has a charging indicator, and the whole

process is done by connecting to a power source via a USB-C cable (included).

Reliable performance

The wireless connection takes place in the 2.4G band via a USB adapter. This means the transmission is stable and interference-free with a range of up to 10 metres. Furthermore, the plug&play system ensures that you can use the device practically as soon as you plug it in - without having to install any additional software! Opt for a proven solution and avoid the frustration of a malfunctioning keyboard.

Kit contains

Keyboard

USB-C cable (1 m)
