Wireless gaming mouse + charging dock Dareu EM901X 2.4G (black)

Dareu EM901X Wireless Gaming Mouse with Charging Station

Do you need a gaming mouse that is designed with comfort and functionality in mind? Then the Dareu EM901X is just for you! Thanks to the 6-level DPI regulation (6000 maximum), you can precisely adjust its operation to your needs, and the dynamic RGB lighting will emphasize the visual value of your gaming station. The device can connect to the computer in 2 different ways, and efficient power supply allows for long operation time.

Full control over precision

The mouse is equipped with the A4090 optical sensor, so it is able to provide extraordinary precision - without stuttering! What's more, it offers 6 DPI levels (max. 6000), so you can adjust its operation to your needs and expectations. The lifespan of the buttons reaches up to 50 million clicks. In addition, it features a refresh rate of 1000 Hz, which significantly contributes to the rapid registration of mouse movements.

2 types of connection

To connect the mouse to your computer, you can use the included USB-C cable or choose the wireless variant. The 2.4G band offers lightning-fast response times and no susceptibility to interference. The device draws its power from a powerful 930 mAh lithium battery, which guarantees an operating time of around 10 days (with 4 hours of use per day). Power can be supplemented via a docking station

with magnetic holder.

Convenient use

Experience a real sense of comfort when using the mouse! The ergonomic design of the EM901X fits perfectly in the shape of your hand. Combined with a very low weight (85 g) it provides a firm grip and precise control over what is happening on the screen. Opt for a combination of comfort and functionality - without compromise!

Gaming design

The device has been designed for gamers - not only in terms of functionality. Its modern design with RGB backlighting will highlight the style of your gaming station! It is also complemented by a docking station - providing the same type of lighting. Now your desk will be an eye-catcher, making it easy to use at night, too.
