

Portable Garment Steamer and Iron 2 in 1 Deerma HS300

Ref: 6955578039904

Portable Garment Steamer and Iron 2 in 1 Deerma HS300

Deerma HS300 clothes steamer

The H300 is a multifunctional appliance that serves as both a steamer and an iron. It has an iron soleplate and, thanks to the 180° angle adjustment function, you can adjust its position to your needs. What's more, it heats up in just 35 seconds, saving you time. In addition, the 160 ml water tank allows you to iron several garments without having to refill it.

2 in 1

The Deerma HS300 is perfect as a steam iron when you want to get rid of creases quickly. You can also use it as an iron to thoroughly iron your clothes. The swivel head allows you to adjust it to your own needs, and the included protective glove is responsible for safety.

Efficient operation

The steamer has a double duct system, which doubles the steam volume for greater efficiency. It also heats up in just 35 seconds and operates at 1000 W. That way you can be sure that your clothes are perfectly ironed in no time at all.

Adapt its operation to suit your needs

The HS300 offers 2 operation modes so you can tailor its performance to suit your needs. Inching mode means the machine generates steam when you press the button and stops when you release it. Automatic mode, on the other hand, generates steam all the time.

Additionally, a dedicated button makes it easy to select the mode.

Carefully thought-out design

The HS300 has an improved third generation glazed soleplate with a surface area of 9964 mm². In addition, for greater ease of use, it has been inclined at an angle of 8°. What's more, its effectiveness is also enhanced by 9 holes that disperse steam evenly. The triangular tip makes ironing collars and buttonholes easier.

Freedom of use

Another advantage of the HS300 is its special heating chamber, which you can use in several ways. You can use the 1 channel and get your ironed clothes dry and ready to wear straight away. If you want to get rid of particularly stubborn creases, choose the 2 channel operation. Dry ironing is also available.

Safe to use

The appliance has been designed for safe operation. The steamer switches off automatically if it gets too hot, and the long, swivelling cable ensures freedom of movement. Moreover, the water tank also serves as a stand, so you don't have to worry about the hot foot damaging your delicate material. In addition, a carrying case is included for easy storage.

Clothes brush included

The set includes a practical clothes brush which can be used to remove hair and wrinkles from your clothes. You can also use it to smooth the material. The brush can easily be mounted on the steamer and will give your clothes a new, improved look.

Large water tank

The water tank has a capacity of 160 ml, which is sufficient for approx. 9 minutes of use. Moreover, you can detach it from the appliance and refill it conveniently. And you don't have to worry about leaks - the steam gun distributes the steam evenly without leaving stains on your clothes.
