M2 Darkflash DM2 COOLER (Passive)

Protect your drive and equip it with an efficient cooling system! Darkflash DM2 ensures optimal heat dissipation and also offers RGB backlighting. It is characterized by wide compatibility and the possibility of instant assembly.

Passive heat dissipation

A combination of plastic and steel ensures efficient heat dissipation, protecting your hardware. This means that the heat is dissipated efficiently, protecting your equipment.

Wide compatibility

DM2 is compatible with M.2 2280 SSDs. This means it works with a wide range of devices available on the market. What is more, its installation is extremely simple and will take only about 30 seconds!

RGB backlighting

The design of the cooler also focuses on emphasizing the visual appeal of your computer. DM2 features RGB backlighting, which can be activated by connecting it to the motherboard with a 3-pin connector (+5V ADD_HEADER). Bet on the combination of functionality and style!
