

Computer case Darkflash DLM23 LED (black)

Computer case Darkflash DLM23 LED (black)

Ref: 4710343790914

Darkflash DLM23 computer case

The modern DLM23 chassis allows you to cool your computer efficiently - you can install up to 5 fans in it. The built-in ports allow you to use the USB 3.0 transmission. The tempered glass side panel can be opened easily and the A-RGB light strip on the front makes the case unique.

Carefully considered design

You no longer need to use tools to open the case and replace parts. You can conveniently open the magnetic side panel whenever you need. Made of tempered glass - allows you to expose the individual components of your computer. It also allows for excellent lighting effects. The product is also distinguished by an excellent texture. But that is not all! The RGB light stripe located on the front of the case can be synchronized with your computer and you can enjoy an amazing spectacle of colors.

Optimal solutions - efficient cooling

Don't be afraid of computer cooling problems. The vents located on the right panel of the case not only do a fantastic job, but also look great. The model is compatible with various components. For example you can install 2 x 120/140mm fans for air cooling and a 240mm water cooler. In total you can install up to 5 fans! The case is also equipped with an internal cooling duct.

Wide expandability

This is not the end of your possibilities though! The model is distinguished by its wide compatibility, and its user-friendly design makes it easy to expand or upgrade your computer. Amongst other things, the case supports the installation of 2.5 SATA hard disk drives or a 210mm power supply.

USB 3.0 compatibility

Discover the advantages of high-speed USB 3.0. The matching port located on the top of the case will provide you with even more convenience. It is also backward compatible with USB 2.0 and comes with HD audio and USB 2.0 ports, so you can customize it to your needs and create the perfect PC for you!
