TWS EarFun Air Headphones

EarFun Air are TWS wireless headphones that are equipped with dynamic 6mm drivers and let you enjoy excellent sound quality. With the charging case, they work for up to 35 hours and with up to 4 microphones, they allow you to talk on the phone comfortably. Bluetooth 5.0 guarantees a reliable connection and the easy-to-use touch panels offer quick access to the most important functions.

Stunning sound

Are you looking for high quality sound? EarFun Air does not disappoint! The 6mm composite dynamic drivers provide enhanced deep bass, rich detail and perfect harmony. They also guarantee extremely low distortion. See how good your favourite songs can sound and rediscover the magic of music!

Perfect call quality

Are you on the phone while shopping in the supermarket or on a crowded bus? Simply pick up the phone and enjoy perfect call quality! The headphones are equipped with 4 microphones to reliably capture sound and eliminate up to 80% of background noise. This makes your voice up to 3 times more audible! Now you can be sure that your caller will hear you without any problems.

Long battery life

Enjoy a long battery life. EarFun Air can play music for up to 7 hours on a single charge. They're perfect for home, work, and travel. Plus, the included charging case lets you extend that time to about 35 hours. You also don't have to wait too long for the headphones to be ready for use again. With just about 10 minutes of charging, they can work for another 2 hours! What's more, the case can be charged not only with a USB-C cable, but also wirelessly.

Designed for your comfort

The headphones are extremely lightweight and comfortable - each weighs just 5.4g. They fit snugly without falling out - even when you're on the move. They're also IPX7 waterproof with SweatShield technology so they won't be affected by sweat or drops of rain. The included interchangeable eartips in 4 sizes (XS, S, M, and L) allow you to customize EarFun Air to fit your needs. The headphones also detect if you have them in your ears and will automatically stop / resume playback depending on this.

Bluetooth 5.0

Forget about connection problems. EarFun Air support Bluetooth 5.0 for fast, stable and reliable transmission. Delays and poor quality are just a memory! What's more, each headphone will connect to your device independently. So you can use them exactly as you like - both at the same time, just the left or just the right.

Touch panels

Now you can have everything you need at your fingertips. EarFun Air features touch panels for convenient operation. No more having to reach for your smartphone every time! With just a few taps, for example, you can pause / resume playback, switch songs, adjust the volume, answer / reject / end a call, or even activate Siri or Google Assistant voice assistant.
