

Wireless keyboard + mouse set MOFII Candy 2.4G (Beige)

Ref: 6950125749268

Wireless keyboard + mouse set MOFII Candy 2.4G (Beige)

MOFII Candy wireless keyboard + mouse set

MOFII Candy keyboard and mouse set is perfect for everyday use, and will also be a great choice for a child. It stands out with its original, stylish design and provides comfort of use. The keyboard is equipped with 84 keys, and the mouse allows you to adjust the resolution in the range of 800-1600DPI, making it ideal for various applications. The devices connect to the computer wirelessly, in the 2.4G band.

Adjustable resolution mouse

You will find a universal mouse that allows you to adjust the resolution in the range of 800 / 1200 / 1600DPI. So you can easily adjust it to your needs and use it for work or even gameplay. The service life of its buttons reaches 3 million clicks. What's more, the ergonomic design makes the mouse fit perfectly in your hand and is extremely comfortable to use.

Compact keyboard

Do you have a small desk? The included keyboard will be perfect for you! It is equipped with 84 keys, so it doesn't take up too much space. The round, tactile keys are distinguished by a lifespan of up to 8 million clicks and easily yield to your fingers for extremely fast response. Convenient operation and cute pastel colors make the keyboard appealing to younger users as well.

12 function keys

What else makes using the included keyboard so convenient? The device is equipped with 12 function keys that will make your work with the computer much easier. With their help, for example, you can easily operate the media player, adjust the volume, use the Internet browser or check your e-mail inbox.

Wireless operation

Say goodbye to tangled cables and enjoy freedom. The included devices connect to your computer wirelessly - in the 2.4G band, using a single USB receiver (6-10m range). The products are compatible with various versions of Windows. You only need one AA battery for the mouse, and 2 AAA batteries for the keyboard. The devices will also surprise you with their long operating time. The hardware does not require the installation of additional drivers, supporting the Plug & Play system.
