

Laser Level Deko Tools LL57GA

Laser Level Deko Tools LL57GA

Ref: 6974491585312

Deko Tools LL57GA laser level

The Deko Tools LL57GA laser level features a swivel base, a functional keypad and a crisp, green laser with a wavelength of 505 nm. It facilitates precise laying of panels or tiles, as well as wallpapering and many other tasks. It uses a self-leveling system with an audible alarm to avoid mistakes at the beginning of work. The leveler is powered by three AA batteries.

Make your work easier

The leveler is perfect for construction or renovation work. It uses a high-end green laser and displays 1 horizontal line and 4 vertical lines, allowing you to evenly lay panels or hang paintings. The working range is 10 m, while the laser wavelength is 505 nm. A 3-stage self-leveling system is responsible for high precision.

Well designed

The leveler has a rotating base, so you can easily adjust the position of the LL57GA to suit your individual needs. At your disposal is also a dustproof keypad, which has been placed in the upper part of the leveler - it will make it easier to operate the device. The product will work well for both indoor and outdoor work.

Included

Charger
