Laser level tripod Deko Tools GJ62

Ref: 6974491583233

Tripod for laser spirit level Deko Tools GJ62

This professional tripod from Deko Tools is compatible with DEKO self-leveling laser levels, cross lasers, rotating lasers, point lasers or optical levels. You can use it both at work and at home - it's lightweight and portable. What's more, it has a built-in bubble level.

Compact and lightweight

The tripod has been made of high-quality aluminum alloy - it is compact and portable, so it is perfect for transportation. In addition, it is characterized by exceptional stability. Its folding legs lock into place with a clamp and non-slip mat to allow you to shoot in a variety of conditions. To keep the mount stable when fully extended - the center column is pivotally mounted.

Expandable

Use the tripod at different heights! The tripod has a three-piece leg height adjustment clamp and an extended center column. This allows the user to expand the tripod from 75 cm to 120 cm (30 inches to 47 inches). What's more, it has a built-in bubble level to help adjust the angle, ensuring maximum accuracy during normal use and professional measurements.
