

Mini wireless projector BYINTEK P20 DLP 3D 4K Android OS

Ref: 798394974853

Mini wireless projector BYINTEK P20 DLP 3D 4K Android OS

Mini wireless projector BYINTEK P20

Are you looking for a compact projector that will allow you to display movies or photos no matter where you are? The BYINTEK P20 wireless mini projector will meet your needs. It's lightweight and about the size of a soda can. It provides excellent image quality in 4K (via cable), and the high-quality RGB 3LED lamp stands out with a life span of 30,000 hrs. Wireless operation and a 5200 mAh battery make the device ideal for outdoor use.

High image quality

The projector uses DLP display technology, and its brightness reaches 280 ANSI lumens. The native resolution is 854 x 480 p, but the projector allows you to display up to 4K resolution (using a cable). So you can enjoy excellent color reproduction, rich detail and clear images. The maximum projection size of 150" and a contrast ratio of 2500:1 are also a plus.

Convenient operation

The projector has a practical function keypad, so you have quick access to the most important functions of the device. The small size (140 x 78 x 78 mm) and 5200 mAh battery make it easy to take the projector outdoors or to friends' places. You'll also find a remote control included, which will make operating the device even easier.

Even more possibilities

The BYINTEK P20 wireless mini projector is compatible with Android OS 9.0, allowing you to watch Netflix videos on the big screen, listen to music from You Tube and use many other applications. The built-in 5W x 2 stereo speakers are responsible for the high sound quality, so you can project a concert broadcast or a match of your favorite team on the big screen.

Well designed

The device allows corner and vertical trapezium correction, so you can easily correct errors caused by misalignment of the projector. Also noteworthy is the quiet operation of 44.4 dB, as well as the zoom function and electronic focus. The device is equipped with 2G ROM + 32G RAM, and is also compatible with DC12V/2A car chargers.

Wide compatibility

The projector has a number of ports, so you can connect a wide variety of equipment to it. For example, you can connect it to your PS4 console, smartphone, tablet, laptop or computer to enjoy gaming on the big screen or display your vacation photos. There are also options to connect a U / TF drive, gamepad, mouse, DVD or speakers.
