

## Projector BYINTEK K25 Basic LCD 4K

Projector BYINTEK K25 Basic LCD 4K

Ref: 798394974877

### BYINTEK K25 Basic projector

The BYINTEK K25 Basic projector uses LCD display technology and provides excellent image quality in up to 4K. It allows vertical keystone correction and also offers electronic zoom and electronic focus. It has a high-quality lamp with a life span of 30000 h, plus a range of ports allows you to connect the projector to multiple devices.

### On the big screen

The native resolution of the BYINTEK K25 Basic projector is Full HD 1920x1080 p, but the device allows you to display in up to 4K (using a cable). So you can enjoy high image quality and create a home theater for you and your loved ones. The maximum projection area reaches 300', and the electric focus and zoom ensure comfortable use.

### Wide compatibility

The device is equipped with two HDMI ports and two USB 2.0 ports, and there are also AV and Mini Jack 3.5 mm ports at your disposal. As a result, the projector stands out for its wide compatibility and you can easily connect it to your computer, PS4 console, U drive and many other devices.

### Easy operation

The projector is equipped with a practical knob, thanks to which you can easily perform trapezoidal correction and eliminate errors made when setting up the projector. Touch buttons that make it easy to manage the device's functions are also a plus, as well as the included remote control. The projector also has a 5W speaker.
