Hobbywing QuicRun 10BL120 120A sensor regulator

A reliable regulator combined with advanced software ensures not only high power output but also ESC system overload protection.

Flexibility and versatility

The main advantages of the regulator are excellent performance and powerful torque. QUICKRUN 10BL60 will meet the expectations of all those who are looking for powerful thrills, but also competitors competing in RC modelin competitions. Thanks to the adjustable ESC, we can enjoy smooth operation of our model.

Excellent cooling system

Hobbywing brand's patented cooling system provides excellent heat distribution. Made in high quality, the regulator combined with the cooling fan allows us to maintain full performance.

Built-in BEC

Built-in BEC mode switch with maximum power and 3A/6V makes this regulator very versatile and compatible with most servos.

□Product name□

□ QuicRun 10BL20
□ Product number □
□ 30125000
□ Motors supported □
□ Sensor / sensorless brushless motors
□ Scale
□ 1:10
□ Continuous / instantaneous current
□ 120A / 760A
□ Power supply
□ 2-3S LiPo/5-9 Cel NiMH
□ Output
□ BEC
□ Line mode:
□ 6V/3A
□ Fan power supply
□ battery
□ Software update
□ Active
□ Size □
□ 43 x 36 x 33 mm
□ Weight □
□ 105 grams
□ Dedicated □
□ 1/10th Touring Cars/Buggies/F1/Drift etc.
□
