Battery condition sensor Xparkle BVM02

Have you ever experienced that your car suddenly did not start? Batteries are not infallible and can fail from time to time. But you can be prepared for this! The Xparkle BVM02 Battery Condition Sensor will give you access to a wealth of information about the condition of your car's power supply. You can conveniently pair the device with the device of your choice via Bluetooth 5.0, displaying all the data from the Android or iOS app.

Peaceful driving

Get the peace of mind you need while you are on the road or just before. The battery health sensor is a practical device for monitoring the state of the power supply to avoid unpleasant surprises when you least expect it. You'll have access to information on starting voltage, the voltage curve over a broader period, charging voltage at idle and at high revs.

Everything at your fingertips

Convenient access to data is ensured by the high-performance Bluetooth 5.0 module, which provides a stable connection with low power consumption. Pair the sensor with the device of your choice to always have your finger on the pulse and be able to react before the battery gives out. You can find all the information about your battery status in the Android and iOS app. The BVM02 also works with Apple Watch smartwatches.
