The tools are made of high-quality Cr-Mo steel and come in a practical box for convenient storage and transportation. It also makes it easier to keep things in order and helps avoid losing the sockets.

Thoughtful design

The sockets were created from excellent quality chrome-molybdenum (Cr-Mo) steel, which makes them extremely durable and resistant to wear. They have also been equipped with an outer protective cover to protect them from damage. What's more, the thin-walled design means that you can also use the sockets in tight, hard-to-reach spaces without any problems.
