Bedside lamp music built-in NiteBird LB2 Tuya

Ref: 6972391288418

Bedside lamp music built-in NiteBird LB2 Tuya

Bedside lamp music built-in NiteBird LB2 Tuya
The LB2 bedside lamp is the perfect solution for any bedroom, whether small or larger. It is equipped with a speaker that can play music via a wireless connection to your phone. With the help of the app you can change its colour, brightness, but also program its operation. The lamp is compatible with Google Assistant and Amazon Alexa and works on the 2.4GHz Wi-Fi band.

16 million colours
Choose from the available colours in the RGB palette and light up your bedroom or child's bedroom to match the decor or your favourite colour. Brighten and dim the light as needed and let falling asleep become more enjoyable.

Built-in music
The light has embedded recordings to help you fall asleep. These include the voices of birds, ocean waves, a stream of water, the sounds of the forest, as well as lullabies. The perfect solution for an even better night's sleep.

App control
Control the lamp's capabilities directly from the app. Change its light, its brightness or simply program it to switch off at the right moment. Schedule it to signal older children that it's time for bed, or set it to turn off just before you fall asleep.

For different times of day
Program the colour and brightness to suit the time of day. No more checking what time it is - the colour of the lamp will tell you. If, however, you prefer the traditional way of checking the time, a clear electronic clock is built into the device, from which you can read the time even in the middle of the night.

Compatibility with assistants
Thanks to compatibility with Google Assistant and Alexa, you can give voice commands to the lamp to control its capabilities. Connect the lamp to your home smart ecosystem to control all the lighting in your home. Teach your kids to give voice commands and let the fun continue.
