

Set of 3 filters PolarPro Vivid for DJI Mini 3 Pro

Set of 3 filters PolarPro Vivid for DJI Mini 3 Pro

Ref: 817465027899

Set of 3 PolarPro Vivid filters for DJI Mini 3 Pro

PolarPro filters are specially designed for the DJI Mini 3 Pro. In the set you will find 3 pieces of product: filter ND8/PL, ND16/PL and ND32/PL, which combine two effects: ND and Polarization. They will allow you to shorten the shutter speed and reduce flare in bright and reflective conditions. This allows you to achieve saturated and natural colors when recording or shooting. The light weight is due to the aluminum frame, so you don't have to worry that the product will affect the flight quality of your drone. The lens is made of German CinemaSeries tempered glass, which has a low refractive index. The filters are placed in a protective case, so you can be sure that they will not be damaged.
