Tattu R-Line 5.0 1400mAh 22.2V 150C 6S1P XT60 battery.

Do not discharge below 3.0V per cell. Charge only with a microprocessor charger in lithium-polymer pack charging mode. Do not short-circuit the terminals, do not puncture, do not expose to direct sunlight, store away from flammable objects, dispose of in specially prepared containers. During the production of the battery, X AI Boehmite technology was used. What's more, the product provides constant and continuous power output and ensures less performance loss after cycles. In addition, it is resistant to drops.
